Task: Code Reviews, Sprint Documentation, and Presentation Preparation

Work Completed on April 11th (3 hours):

- Conducted multiple code reviews for teammates' pull requests.
 - Focused on ensuring readability, consistency, and clean architecture.
 - Provided comments to improve naming conventions, component reusability, and error handling.
 - Verified new features by running the code locally and checking against the acceptance criteria.
- Helped resolve minor merge conflicts and confirmed successful integration after merging.
- Contributed to the Final report:
 - Wrote descriptions for major features and technical decisions.
 - Documented implementation challenges and how they were addressed.
 - Ensured consistent formatting and accessibility for both technical and non-technical readers.
- Created the final presentation slides for the project oral:
 - Structured the slides to cover all key areas (overview, features, tech stack, team contributions).
 - Included visuals and concise points to support a clear and professional delivery.
 - Collaborated with the team to review the content and refine the final version.
