

Personal Log for Sprint 4 – Apple Pie Club

Task #	Title	Time Spent (in min)	Description	Completion Date
186	Perform Code Review for Profile Personalization (US.13)	60	Examined a teammate's code for one of our unique features (profile personalization) to ensure it meets the team's quality standards and to identify areas of improvement. Reviewed code readability and ensured consistency with the project's structure and style. Offered feedback and suggestions to my teammate.	04/09
203	Adding tags to messages (urgent, important, custom)	240	I implemented this feature by adding a tagging system to messages through the MongoDB schema, allowing users to categorize them as "urgent," "important," or custom for better organization and prioritization. It was very thorough and required consistency with fetching and posting to the database, making it my longest task for the sprint.	04/07
223	Perform Code Review for Message Enhancements (US.12)	60	Examined a teammate's code for two of our core features (emoji reaction and quoting) to ensure it meets the team's quality standards and to identify areas of improvement. Reviewed code readability and ensured consistency with the project's structure and style. Offered feedback and suggestions to my teammate.	04/10
227	Perform Code Review for Photo Messaging (US.17)	60	Examined a teammate's code for one of our unique features (photo messaging) to ensure it meets the team's quality standards and to identify areas of improvement. Reviewed code readability and ensured consistency with the project's structure and style. Offered feedback and suggestions to my teammate.	04/09
221	Perform Code Review for Text Channels Enhancements (US.10)	120	Examined two of my teammates' code to ensure it meets the team's quality standards and to identify areas of improvement. This was for one of the core features of our application, so it required more time. Reviewed code readability and ensured consistency with the project's structure and style. Offered feedback and suggestions to my teammate.	04/09
N/A	Working on the organization of the repository	200	Created the user stories, worked on their definition, and created corresponding tasks. Organized the created tasks in the sprint planning and communicated with the team for their implementation. Associated PRs with tasks for easier access.	Until the end of the sprint
N/A	Working on documentation	200	Worked on the meeting minutes and the sprint planning. Also worked on the project report and the presentation slides.	Until the end of the sprint
