SOEN 341 LAB Participation log

Num ber of sprint	User story title	priority	Description/Associ ated Tasks	Risk	Difficulty Level (0,1,2,3, 5,8)
1	Implement password hashing for security	MED - Nothing is relying on the hashing of users password at the moment since the product is still not launched so can be implemented after more important tasks	Setting up single hashing for the password so that it is encrypted and not accessible to attackers.	LOW - there is no risk to security at the moment so it is more of a feature with no use at the moment	3
1	Create page for creating chats	MED	It be will hosted at chats/create This page will be accessible from the home page It should allow users to create their own chats Users will tentatively become admins by default when they create a chat	MED - since there are no admins at the moment, it doesn't need to be working and nothing is relying on it	3

1	Create an 'add user' button on each channel for admins	MED	This button will be for admins to add users to a channel they don't have access to yet. To do this, they will get a users's username (or ID) and will 'whitelist' the user for that channel	MED - nothing in sprint 1 requires this to be done immediately and can be tested later on in the sprint	2
2	Implement notification feature	LOW	Notify users when they receive a new message in a channel they are not currently viewing.	LOW - this feature has no impact on the behaviour of the system.	2
2	Work on UI of messages for admin	LOW	Improve the design of how messages appear to admins, ensuring clarity when moderating messages.	LOW - The front-end is low risk.	2
2	Add a dropdown in the channel which allows the admin to see all users in that channel	LOW	Implement a dropdown feature that lists all participants in a channel for easy management.	LOW - This is an additional feature to create a better user experience. It entails no risk.	2
3	Write 2 acceptance tests for Sprint 3				3
4	Implementing deletion feature	HIGH	Allows users to delete messages and it no longer shows up for other users	MED- this is considered a important feature	3
